

# Milad Rastin | Front-End Developer

**Email:** miladrst.developer@gmail.com | **Linkedin:** linkedin.com/in/miladrst | **Phone:** +989112439365

## Summary

---

Front-End Developer with over 5 years of experience in creating cross-platform websites and web applications. Possess a strong proficiency in JavaScript, TypeScript, Vue JS, Nuxt JS, and CSS preprocessors. Skilled in utilizing Tailwind CSS, Bootstrap, and Git workflows to enhance development efficiency. Also familiar with React and Next JS. Experienced in leading front-end teams on large-scale projects. Seeking a challenging role at an innovative company where I can contribute to impactful projects and advance my expertise.

## Experience

---

### **Front-End Developer** | ArzDigital – Dubai, UAE – Full-time (remote) **10/2023 – Present (9 mos)**

- ArzDigital is the leading online audio and video media company in the world of cryptocurrency in Iran, providing comprehensive educational resources and insightful market analysis.
- Developed [ArzDigital extension](#) using Vue JS available on the Chrome Web Store with over 4,000 users and an impressive rating 4.7 out of 5.

### **Senior Front-End Developer** | Mihan Web Host – Rasht, Iran – Full-time **04/2022 - 09/2023(1 yr 6 mos)**

- Mihan Web Host is one of the top 5 leading hosting companies in the Iranian market, offering services from shared hosting to web development.
- Developed a single-page e-commerce app called Zanbil using Nuxt JS. This product increased the company's revenue by 10%.
- Led the front-end team on the [MihanShop](#) project (an online shop builder) that delivered 5+ SPA e-commerce templates on time and within budget with a 95% client satisfaction percentage as a result.
- Demonstrated strong teamwork, fostering a collaborative environment that led to a 15% increase in team productivity.
- Mentored junior developers to onboard faster and come up to speed with the company resulting in a 25% increase in their productivity and skill level.

### **Front-End Developer** | Mihan Web Host – Rasht, Iran – Full-time **08/2020 – 04/2022(1 yr 9 mos)**

- Reduced the average time users spent searching for available domains from 20 to only 7 seconds on the Mihan Web Host official website by developing a JavaScript recursive asynchronous function.
- Created a web application using Vue JS to calculate service costs based on multiple parameters for the Mihan Monitor platform (an online monitoring service). This led to an 80% reduction in server requests.
- Improved Mihan Web Host official website performance, reducing page load times by an average of 30% causing a raise of 20% increase in user engagement.
- Completed 50+ number of projects before their deadlines.
- Won the Mihan Web Host front-end code challenge two times in row.
- Selected as an exemplary employee of the year once.

- Implemented major redesign and optimization on the Plaza official website resulting in a significant 40% improvement in performance compared to the previous version.
